RADON™
DESIGNED BY HANS SANDGREN JAKOBSEN

LIGHT UP YOUR INTERIOR DESIGN WITH A GLOW OF SUNSHINE

With its bright yellow colour, RADON™ Solis adds a bold and personal touch to the iconic RADON™ series. And most importantly challenges how we perceive the combination of minimalism, functionality and colours in design.

RADON™ Solis comes with a lot of effects. With its eye-catching design, you cannot stop smiling, all your interior design will brighten up, and you will reveal yourself as an interior aficionado.

The RADON™ series is widely acknowledged for its perfect combination of functionality and minimalism.

RADON™ Solis adds a bold and colourful twist to the well-balanced and simplistic design. Like a sincere nod with a glint in its eye. The monochrome look, merging the shade and cord into one uninterrupted whole, emphasizes the uncompromising design that characterizes RADON™ Solis and the entire series.

Why hide one's light under a bushel?
