

# SMALA

**Design by**  
Pascal Mourgue

**Description**  
Smala is a practical settee with pure, clean lines which all but floats above the ground, inviting you to come up and relax.

**Technical Specifications**  
**STRUCTURE**  
Frame in rectangular tubular steel, with slatted suspension. Seat and back in high resilience polyurethane foam (38kg/m³ - 3.2kPa). Feet in moulded polished aluminum, mounted on a tubular steel frame, finished in Epoxy aluminum lacquer.

**COMFORT**  
An ingenious system of articulation allows the two armrests to be positioned at any one of three levels; the two backrests may be similarly operated, meaning that the three-seater sofa can be transformed into a chaise longue (one armrest raised and the two backrests lowered), or even a bed (sleep area: 90 1/2" x 51 1/4"). A white cotton fitted sheet is available both to protect the seat and add a touch of luxury: this has slits to accommodate the armrests. Although the cover is buttoned, the covers may still be removed as the buttons are fixed to the cover and are then toggled to the frame.
